(54) IMAGE PROCESSING UNIT

(57)Abstract:

PROBLEM TO BE SOLVED: To omit troublesome entry operation such as a user name or a password for accessing by collating user information described on an original having a prescribed format with user information managed in advance so as to allow the user to use an information recording and reproducing device.

SOLUTION: A large capacity recording disk 14 is connected to a computer 11 and in order to access the recording disk 14, it is required to register a user name and a password corresponding to the user name. In the case of log-in, the right of access to the large capacity recording disk 14 is obtained by entering the correct user name and the correct password. That is, the user uses the large capacity recording disk 14 quickly without troublesome key entry of the user name or the like for the access by allowing the large capacity recording disk 14 to read a long-in sheet on which the user name and the password or the like for access are described.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
